Overall Stats

- 10 Questions
- 38 Responses

2022 Survey: <https://s.surveyplanet.com/hd6x8adf>

Observations

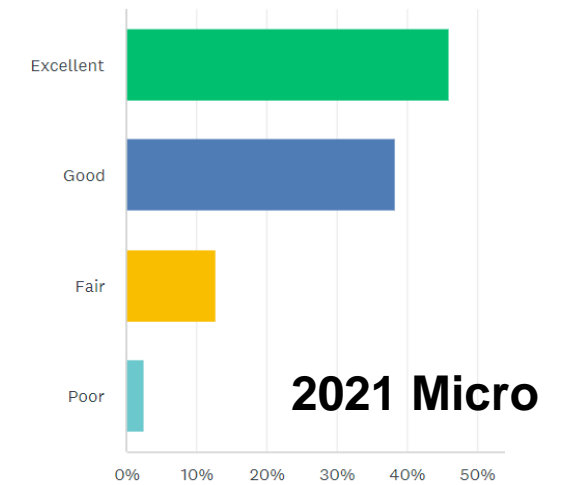

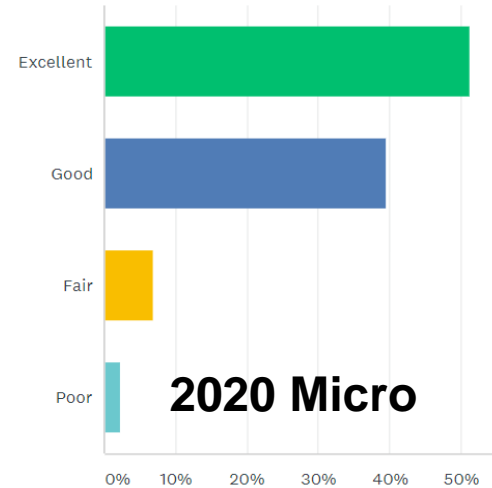

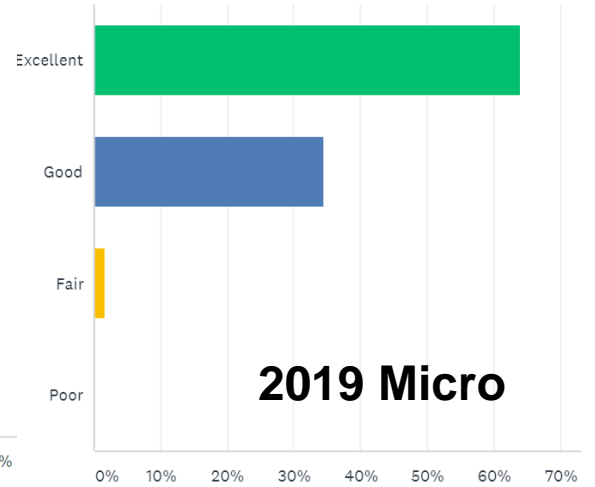

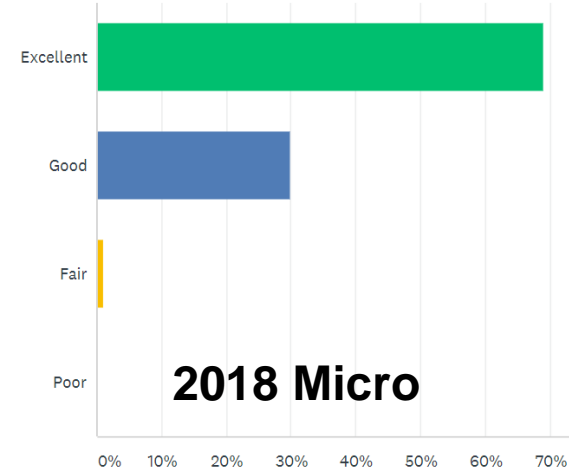

1. Overall sentiment was very positive – quantitative and [comments](#).
2. Higher satisfaction with physical conference than virtual during Covid.
3. High ratings for Chicago as host city.
4. A few concerns about food.
5. CHIPS Act and Similar: *73% No Direct Impact. 27% Some Help.*

1. Overall Impression of Micro

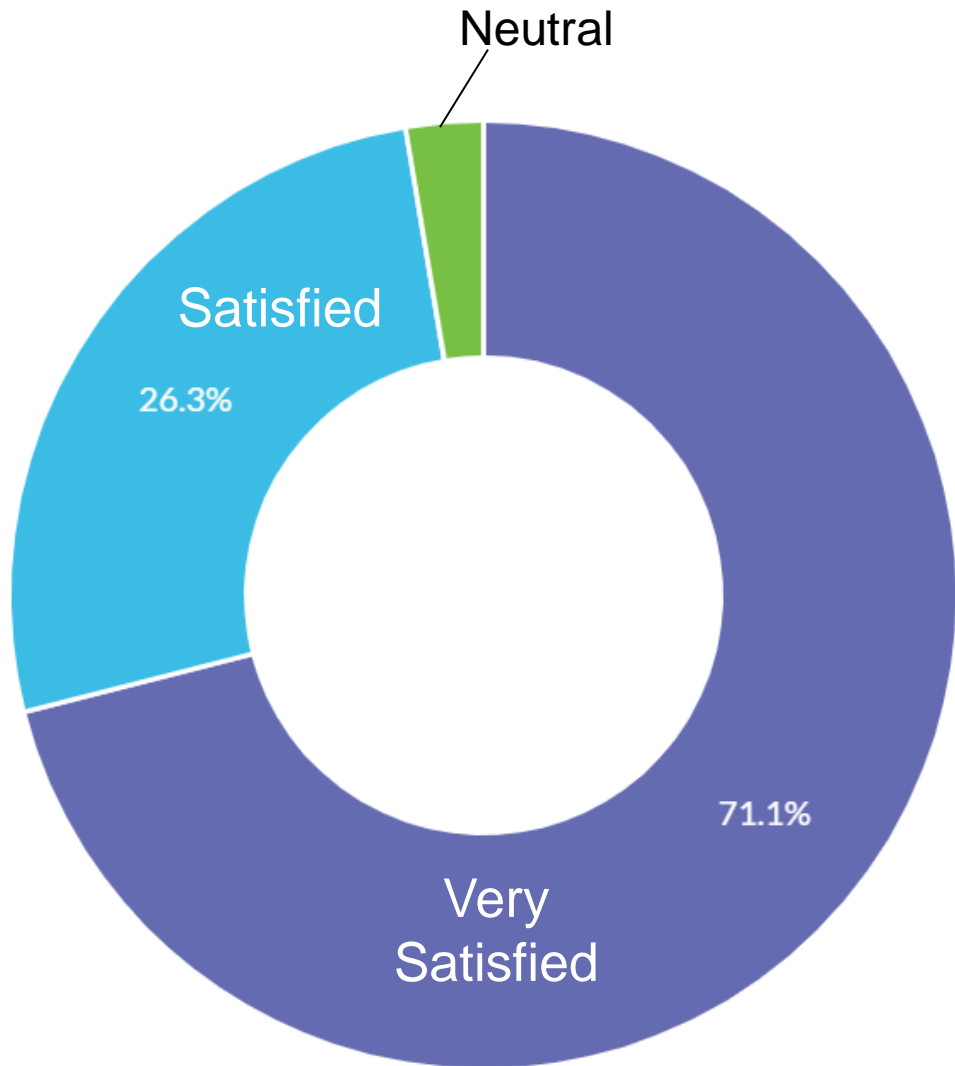

2022 Micro

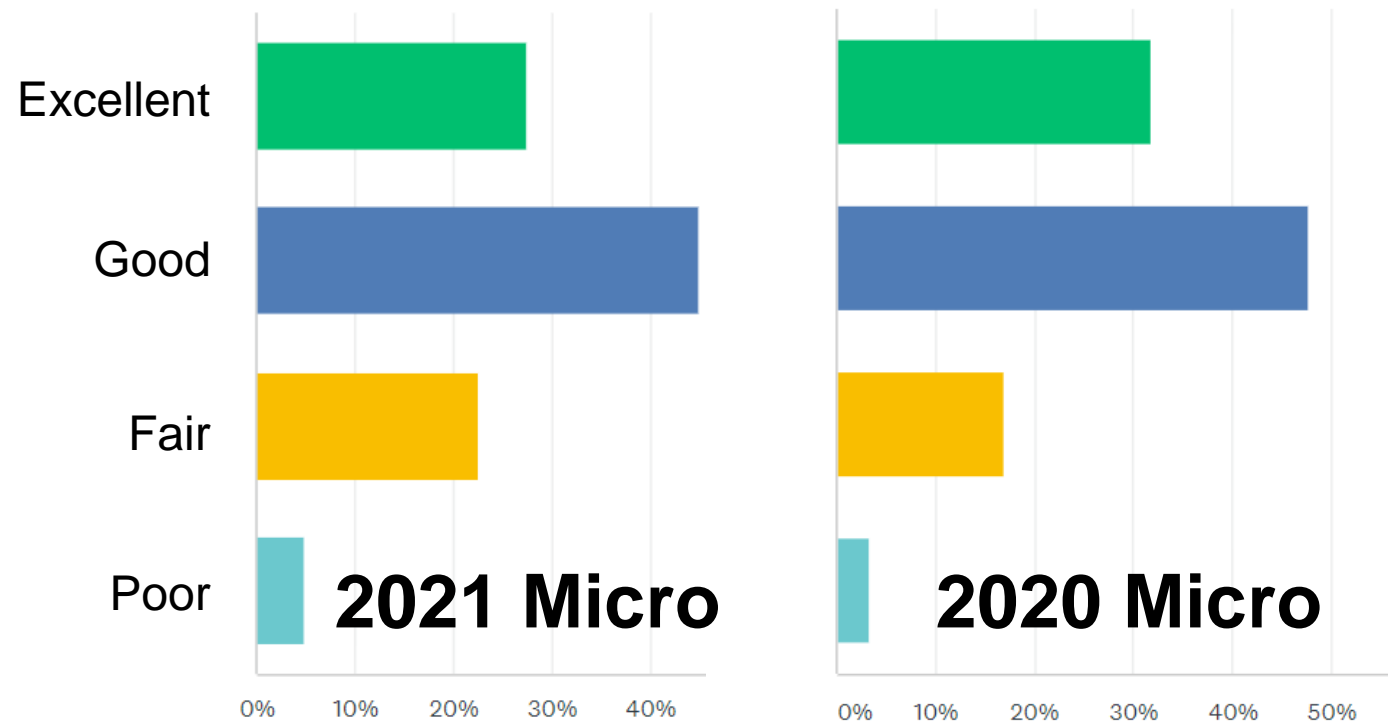

Very Positive Views.
Similar to recent history

2. Reaction to Micro-55 return to in-person format?

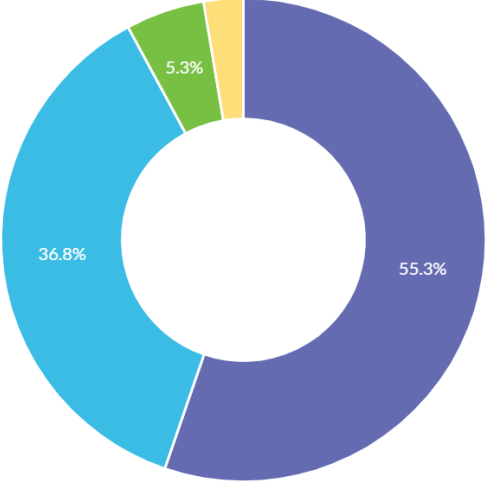

How effective was the virtual format of Micro?

3. View of Chicago as city for Micro-55

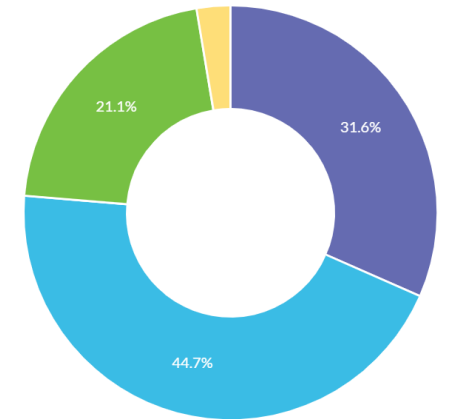

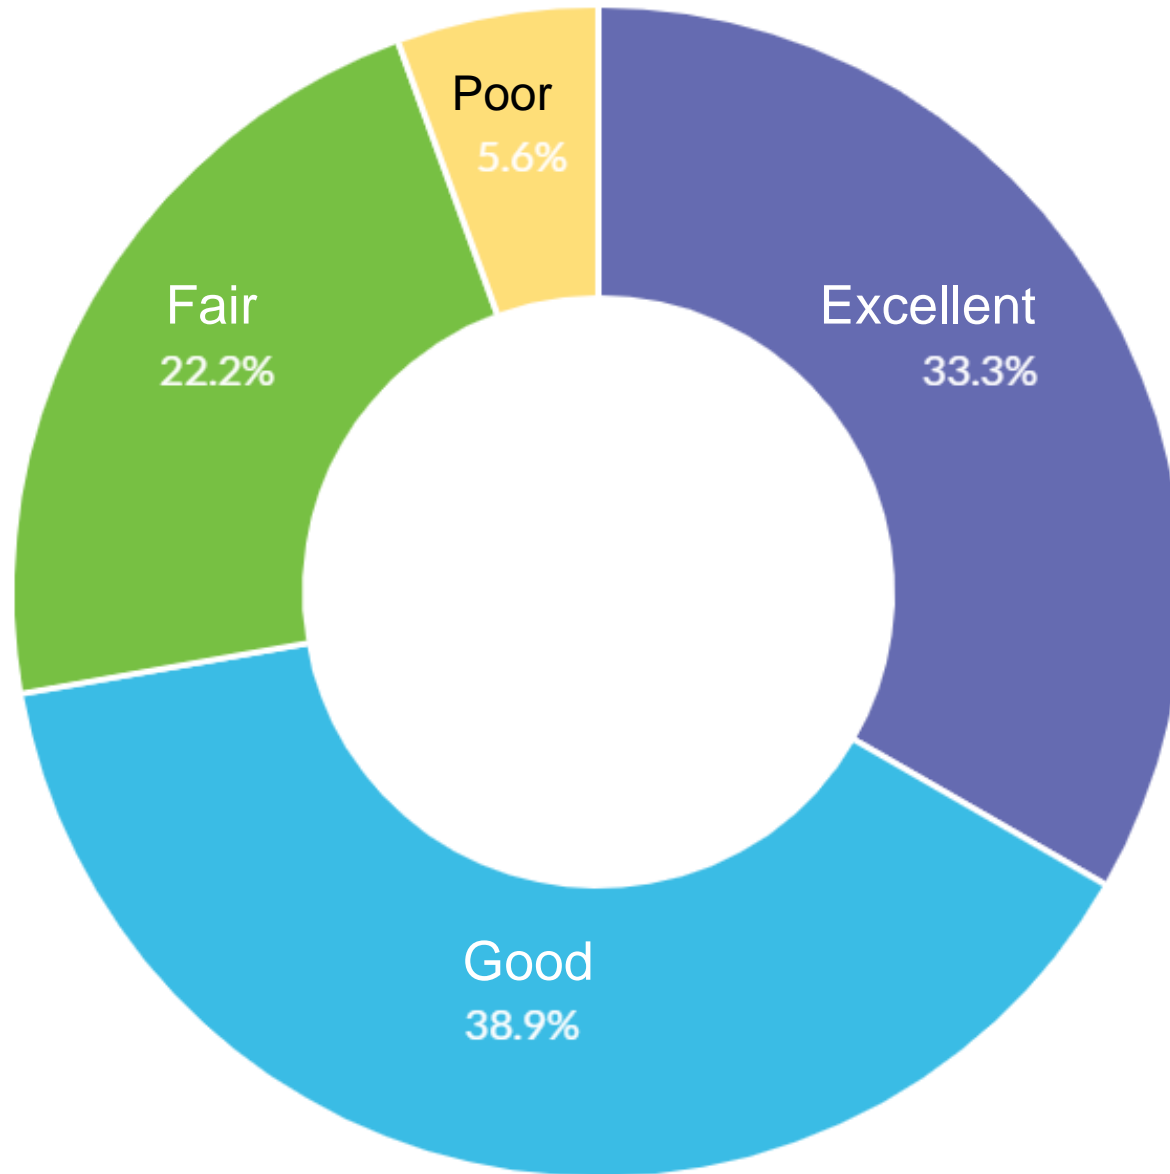

4. View of Westin-Chicago as hotel for Micro-55?

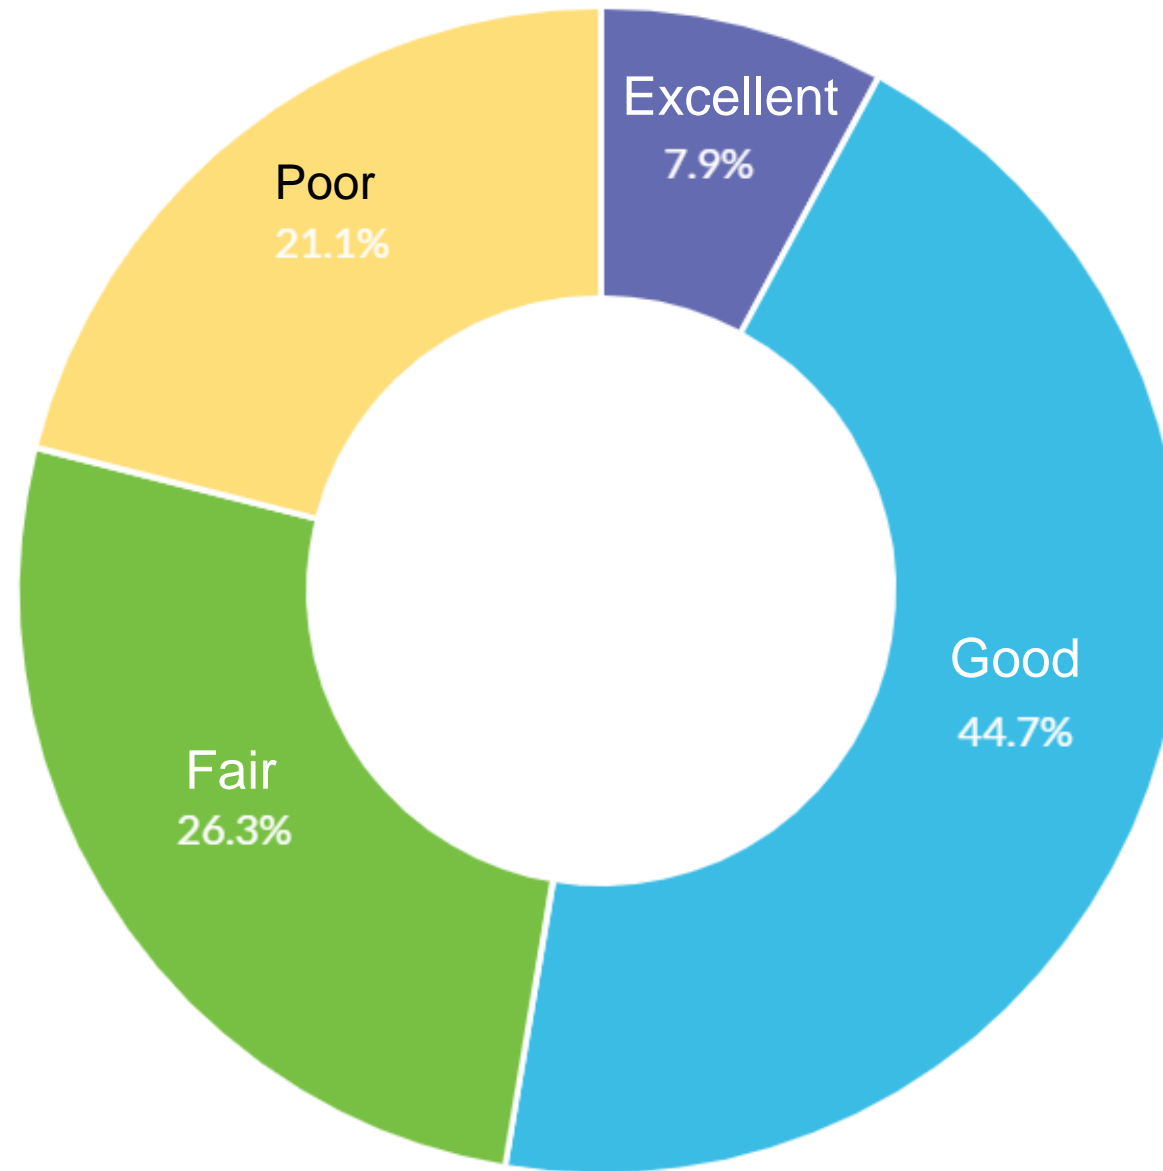

View of Chicago:
Better than Westin

5. View of outing and banquet at Field Museum?

View of Westin:
Similar to Field Museum

6. View of other food and beverages at Micro-55?

7. View of the Panel Discussion

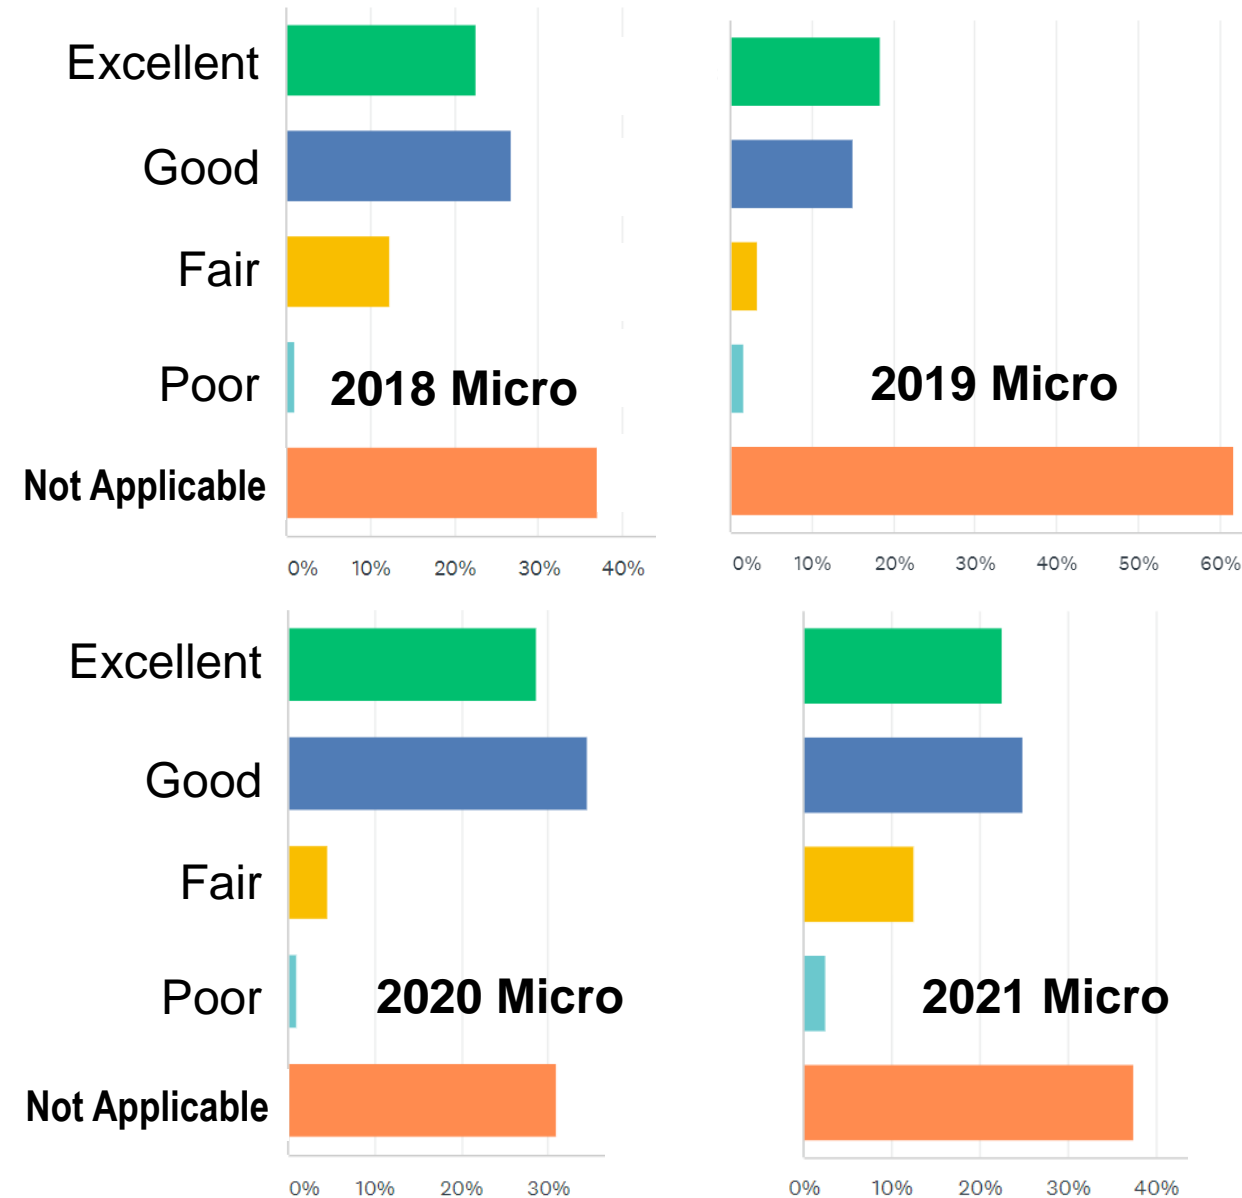

Sustainability Challenges for Computing

- Andrew Chien (Chair)
- Alex K. Jones
- Brandon Lucia

8. View of Workshops and Tutorials?

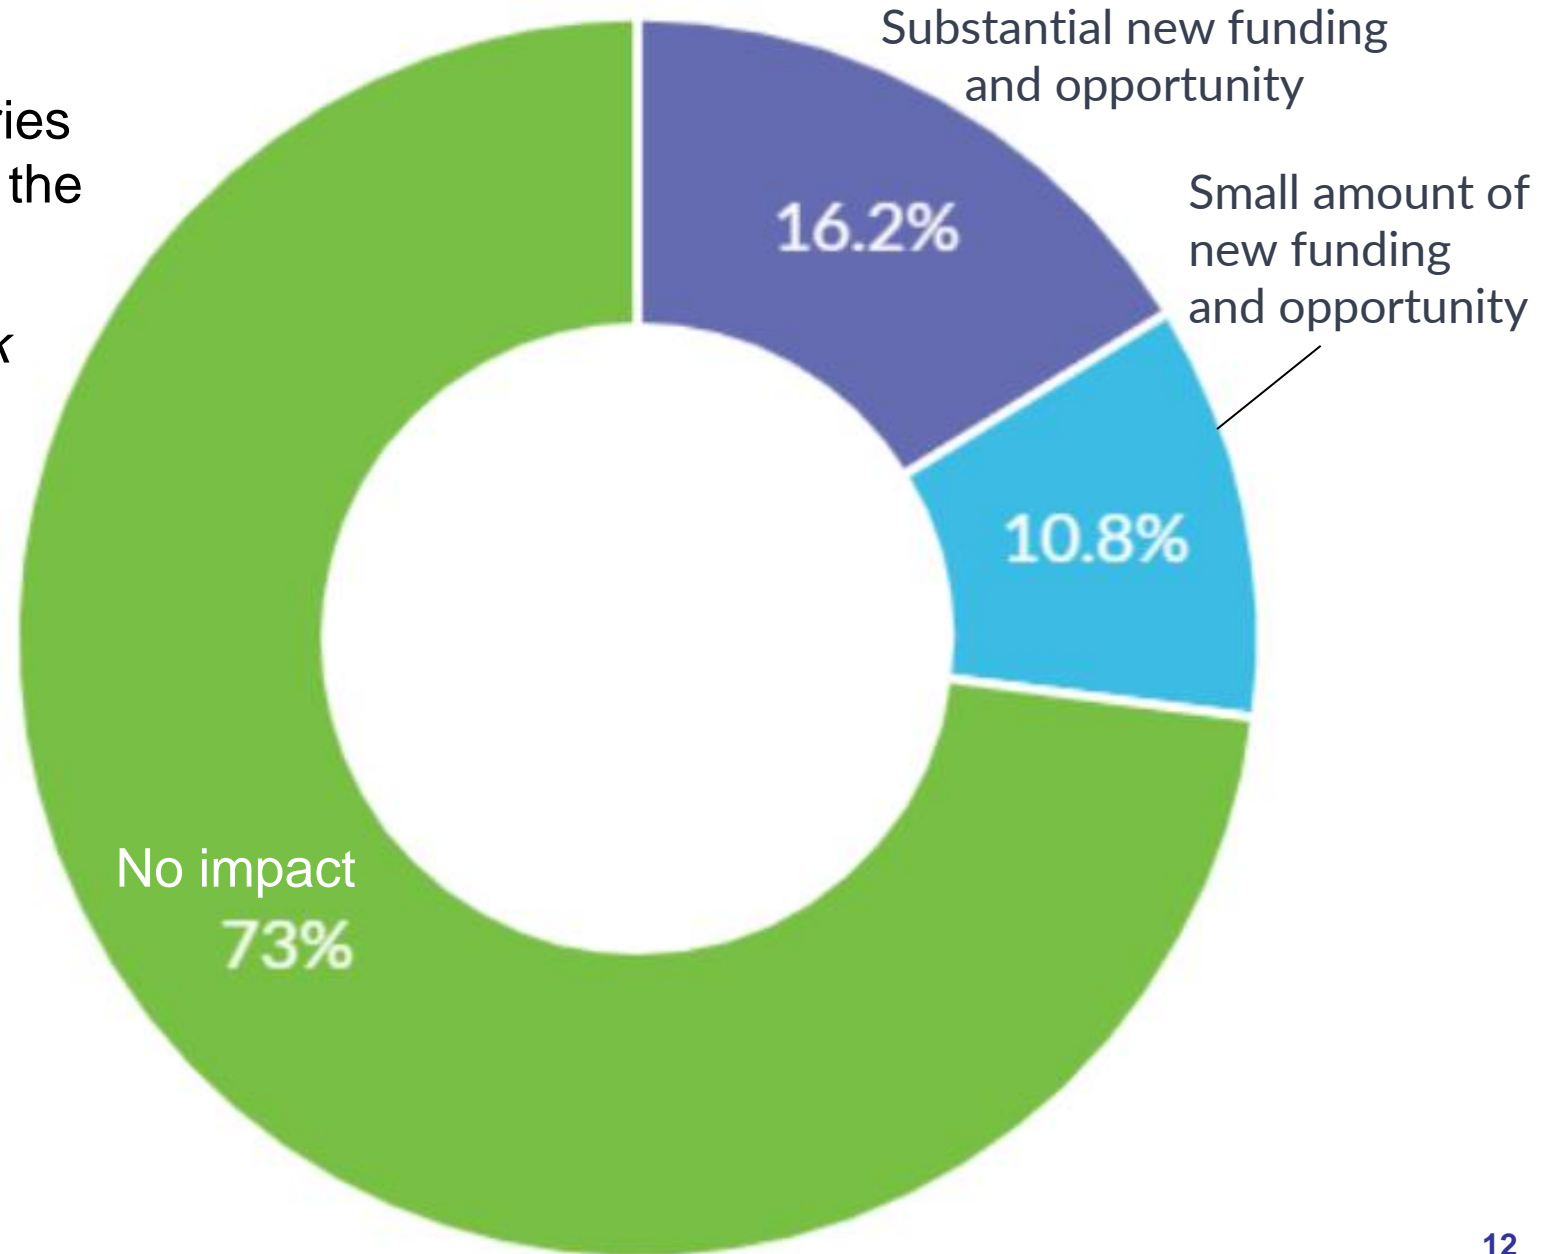

Strong Showing vs Recent

9. Impact of CHIPS Act and Similar

The United States and many other countries have passed laws to increase funding for the semiconductor and computer industries.

How have these laws impacted your work and research?

10. Any other comments

Date	Answers
Oct 6	Some of the rooms were too cramped for some of the workshops and tutorials...
Oct 6	It was a great conference. As a first timer, it gives me motivation to publish more work.
Oct 5	More coffee would be nice
Oct 5	The audio system needs to be improved. Many presentations were difficult to hear or did not have working microphones. Really sad to see.
Oct 5	Downtown Chicago was not easy to access and especially parking was not easy. The banquet food and location was underwhelming too. Not great food options especially for people with dietary restrictions and seating was too sparse. On a more positive note the catering staff were amazingly nice and helpful. The food and snacks at the conference was very good. Also the panel was great I hope to see more efforts like this and more attention on sustainability and environmental impacts of our industry in the future events.
Oct 5	The food available to vegetarians was terrible - only salads were available for most meals. Even for meat options, almost exclusively beef and pork were made available -- many acquaintances skipped meals because of this due to religious restrictions with eating beef/pork. It would be great if more options are made available for inclusivity!
Oct 5	Very expensive for what was provided. Not enough space provided for workshops.
Oct 5	It would be great if there were more diet options such as vegetarian main meals.
Oct 5	Adding fruits to the afternoon breaks would be great. We are not cookie monsters:-)
Oct 5	Add vegetarian and/or no-pork/beef options for food please
Oct 4	For SIGMICRO candidates, it would be more democratic to select a broader range of candidates and then internally either the selected candidates can choose the roles or they can select based on the number of votes.
Oct 4	Overall fantastic. First keynote was amazing. Thanks for a really great job everyone!
